VIKTOR NEŠIĆ

SENIOR MOBILE ENGINEER · iOS · Android · Kotlin Multiplatform

Zlatibor, Serbia · v.nesic.developer@gmail.com · linkedin.com/in/viktor-nesic · github.com/vikktorn · github.com/Vprogrammers · vprogrammers.me

PROFESSIONAL PROFILE

Mobile engineer with 10+ years in software and experience across 20+ mobile apps. Over five years at Merkle (part of dentsu), developing enterprise iOS features, maintaining production applications and assessing native mobile architectures for international clients. Brings practical judgment on legacy modernization, API integration, offline data, accessibility and cross-platform boundaries, with hands-on delivery in Swift/UIKit/SwiftUI, Kotlin/Android and Kotlin Multiplatform.

Domain experience: Enterprise B2B · Retail & Wellness · Banking Assessment · Photography Operations · Booking & Business Services

TECHNICAL SKILLS

iOS: Swift, UIKit, SwiftUI, WKWebView, Combine, ARKit, AVFoundation, Vision/Core ML, AppAuth, Xcode, TestFlight

Android: Kotlin, Java, Android Views, Jetpack Compose, Coroutines/Flow, Gradle, Android SDK

Cross-platform & architecture: Kotlin Multiplatform, shared repositories/models, SQLDelight, Koin, MVVM/MVI, modular design, REST, GraphQL

Backend & delivery: Firebase/Firestore, OAuth/OIDC, push notifications, Git, GitLab CI/CD, unit/UI testing, accessibility, QA collaboration

Frontend: TypeScript, Twig, SCSS, Drupal component integration, Nitro previews

PROFESSIONAL EXPERIENCE

Merkle (dentsu) — Mobile & Frontend Engineer | Apr 2021 – Oct 2026

International digital consultancy within dentsu. Worked across client mobile applications, frontend delivery, technical assessments and internal engineering libraries with multidisciplinary teams.

Hansgrohe ProApp — iOS & Kotlin Multiplatform Developer | Sep 2022 – Jul 2024

Enterprise B2B iPad product-presentation application for field sales at Hansgrohe, a global sanitary-products manufacturer. Team: three mobile developers plus an intern, three designers, QA tester, Scrum Master, client Product Owner and agency project manager; additional backend/web collaboration.

- Developed native Swift/UIKit application features integrated with KMP data repositories, GraphQL, SQLDelight, local media and content synchronization for offline use.
- Worked across mobile, design, backend, product and QA; reviewed and approved code changes from a student intern.

CGIAR — Frontend Engineer | Oct 2024 – Nov 2025

Frontend component development for CGIAR, an international agricultural research organization; website components assembled into pages by client administrators in Drupal. Team: four frontend developers, three Drupal backend developers, three designers, project manager and QA.

- Developed reusable responsive Twig, SCSS and TypeScript components, with Nitro component previews and integration into Drupal-managed pages.

Migros iMpuls Coach — iOS Maintenance Developer | Nov 2025 – Oct 2026

Production iOS wellness application for Migros, a major Swiss retailer. Worked as the remaining developer from the original mobile team, collaborating with QA and coordinating access and project requirements with relevant stakeholders.

- Maintained Swift/UIKit application behavior and compatibility, updating dependencies and API endpoints, and working on AppAuth authentication/session and WKWebView integration.
- Prepared and distributed TestFlight builds for QA verification and supported release preparation.

European Bank (NDA) — iOS & Android Design-System Assessment | Dec 2025 – Feb 2026

Banking design-system assessment. Assessment team: mobile (Viktor), web frontend developer, Figma designer and agency Product Owner; engaged with client design and platform specialists.

- Reviewed existing iOS/Android implementations through restricted read-only access and developed recommendations on semantic tokens, native components, accessibility, compatibility and migration.
- Mobile findings formed part of a client-accepted assessment; implementation remained with the client's internal team.

Bucherer — iOS WebView Feasibility PoC | Mar – Apr 2026

Mobile feasibility engagement for Bucherer, a luxury watch retailer. Sole mobile engineer for feasibility analysis, in contact with agency managers and two web developers.

- Independently developed a WKWebView prototype to investigate website continuity and payment-flow feasibility across Salesforce and non-Salesforce sections; documented issues and mobile estimates.

PMI Sweden / Koch — Mobile Codebase Assessments | Approx. Sep 2021 – May 2022

- Independently assessed inherited Objective-C/UIKit and native iOS/Android codebases and integrations ahead of proposed maintenance engagements; coordinated with project stakeholders.

YAMVIP / ANUBIS / Merkle KMP Application Template — Internal Engineering | Approx. Sep 2023 – Oct 2024

Collaborative engineering work with a variable team of approximately five to nine members, depending on client assignments.

- Developed and discussed KMP presentation patterns (StateFlow, intents, reducers/effects), server-driven native UI rendering for Compose/SwiftUI and reusable multi-module application examples.
- Contributed implementation and shared technical decisions; internal reference work, not claimed as production-adopted client software.

Technical Interviews & Candidate Assessments | May – Sep 2026

- Designed a practical Kotlin Backend-for-Frontend coding challenge, reviewed candidate submissions and provided verbal technical assessments.
- Conducted senior mobile interviews using candidate-specific questions on iOS, Android, KMP, architecture, testing and engineering judgment; contributed to candidate selection.

INDEPENDENT / PROJECT-BASED ENGINEERING

VProgrammers — Independent Mobile Developer | May 2016 – Present (project-based)

Hands-on independent development of native iOS, Android and Kotlin Multiplatform applications. Personally implemented the projects below; BezBrige also involved design collaboration. Individual project dates are omitted where not reliably known.

BezBrige — Kotlin Multiplatform Client-Management App

- Developed native SwiftUI and Jetpack Compose interfaces with shared Kotlin Firebase repositories and ViewModels; implemented client, contract, note and reminder workflows. Collaborated with a designer.

PhotoStory — Photography Operations App (iOS / Android)

- Developed native SwiftUI and Compose experiences for appointments, team assignments, booking states and financial records, using Firebase; shared models and localization through KMP while substantial platform logic remained native.

Masse — Android Booking App & Web Dashboard

- Developed a native Android Java/Views application and connected web administration dashboard for billiards/darts bookings, pricing, opening hours and Firestore-backed reservations.

a11yOtp — Open-Source Accessible OTP Library

- Developed shared Kotlin OTP input/state logic, native Android Compose and iOS UIKit components, and a SwiftUI wrapper; implemented screen-reader semantics, input progress/error handling, paste/autofill and targeted tests.

VProgrammers KMP Project Template

- Developed reusable starter/reference foundations with native Compose and SwiftUI screens and shared models, repositories and use-case patterns; branch capabilities differ and are not represented as production guarantees.

AppleDetect — iOS Camera & On-Device ML Prototype

- Integrated an existing Core ML model through Vision and AVFoundation to process camera frames and render detection results in a native iOS interface; no model-training or accuracy claim.

Hanze3 Radio — Radio & Listener Interaction App

- Developed radio streaming and listener interaction features, including comments and requests to join live conversations subject to administrator approval.

Yaaxa — Social Networking App

- Developed native iOS social-networking functionality, including real-time video calling.

PerfectMatrimoni — Matchmaking App

- Developed a mobile application for a matchmaking use case.

HouselekRenhold — Cleaning Services App

- Developed a mobile application for a cleaning-services use case.

Other independent applications

Additional mobile engineering work across booking, media, social and business workflows.

OPEN-SOURCE / ADDITIONAL TECHNICAL WORK

Mobile A11y Agent Skills / Lite

- Developed publicly available agent/skill guidance for reviewing mobile accessibility in Android, iOS and KMP projects, referencing platform accessibility APIs and relevant standards.

EDUCATION & TRAINING

ITAcademy, Belgrade — iOS/Swift Development (2015–2016); Android Development (2016–2017); Java Developer training (2014–2015).

University of Belgrade, Faculty of Law — Undergraduate studies, not completed (1996–2000).
